

# SYNTHETIC QUOTATION - INDEPENDENT HOLDOUT

V72-HOLD-05 | page 1 of 2 | native text

| QUOTED TERM                    | SUPPLIER WORDING                            |
|--------------------------------|---------------------------------------------|
| Quoted by                      | Cinderline Prototype Supply Ltd.            |
| Registered country             | Registered in United Kingdom                |
| Procurement class              | Synthetic evaluation semiconductors         |
| Line description               | Nova sensor hub                             |
| Actual manufacturer            | Manufactured by Invented Mixed Signal PLC   |
| Maker P/N                      | Exact factory code: NSH-440-B               |
| Package designation            | Body/package: BGA-96                        |
| Silicon revision               | Device revision is R4                       |
| Conflicting technical addendum | Device revision is R5                       |
| Stock state                    | Factory-new and unused production stock     |
| Currency code                  | All commercial amounts use GBP              |
| Quoted basis price             | GBP 1124.80 covers a block of 200 pieces    |
| Pricing block size             | The quoted rate covers exactly 200 piece(s) |
| Basis unit                     | The pricing basis unit is piece             |
| Shipping pack style            | Sales packaging is tray                     |

# SYNTHETIC QUOTATION - INDEPENDENT HOLDOUT

V72-HOLD-05 | page 2 of 2 | native text

| QUOTED TERM               | SUPPLIER WORDING                                             |
|---------------------------|--------------------------------------------------------------|
| Pieces per container      | One sales pack contains exactly 100 piece(s)                 |
| Order step                | Accepted purchase quantities increase by 200 piece(s)        |
| Minimum accepted quantity | The minimum accepted order quantity is 8                     |
| MOQ UOM                   | The stated MOQ is measured in tray                           |
| Shipping status           | Freight is charged separately at a stated amount             |
| Freight value             | The complete freight charge is GBP 66.25                     |
| Tax handling              | Tax is explicitly not applicable to this synthetic quotation |
| Lead-time number          | The promised lead-time count is 7 days                       |
| Days definition           | Count calendar days including weekends                       |
| Promise endpoint          | The promise ends at customer arrival                         |
| Lead-time origin          | Lead-time clock starts after written order confirmation      |
| Payment clause            | Net 20                                                       |
| Offer issue date          | Issued 2026-11-20 (ISO 8601)                                 |
| Last valid date           | Valid through 2026-12-12 at end of day                       |
